Ho Chi Minh City, Vietnam | (+84) 942 557 949 | dungletronghoang@gmail.com | linkedin.com/in/letronghoangdung | github.com/Dungle-24

SUMMARY

Final-year Information Systems student at UIT aspiring to build a career in Business Analysis. Strong foundation in requirement elicitation, user story mapping, workflow modeling (UML/BPMN), and UI/UX prototyping, with hands-on experience across software projects. Experienced in Agile delivery, UAT, and cross-functional collaboration, with technical literacy in SQL and REST APIs. Eager to apply analytical thinking and documentation skills to support requirement analysis, functional specifications, testing, and software delivery.

EDUCATION

University of Information Technology (UIT)

Bachelor of Information Systems

• **GPA:** 7.7 / 10.0

• **Relevant Coursework:** System Analysis & Design, Information Systems Project Management, Database Management Systems, Software Engineering, Web Development.

Ho Chi Minh City, Vietnam

Sep. 2022 – Feb. 2027

SKILLS

Business Analysis: Requirement Elicitation, User Stories & Acceptance Criteria, Functional Specification, Use Case Specification, Business Process Modeling (UML/BPMN), Wireframing & Prototyping, UAT Support

BA Tools & Management: Jira, Figma, Confluence, Postman, Draw.io, StarUML, MS Office, WBS

Technical Literacy: SQL (PostgreSQL, MongoDB), Database Schema Design (ERD), RESTful API Specification, Web/Mobile Stack

Process & Soft Skills: Agile/Scrum, SDLC, Analytical Thinking, Problem Solving, Cross-functional Communication, Team Collaboration

PROJECTS

Company Recruitment Management System (HRMS) | ITBA / Scrum Master Role 03/2025 – 05/2025

- Gathered functional requirements, created User Stories, and managed the product backlog using Jira.
- Designed UI/UX wireframes and interactive prototypes on Figma for candidate portals and HR dashboards.
- Built Work Breakdown Structures (WBS) and Gantt Charts to track project timelines and align requirements with the development team.
- Conducted User Acceptance Testing (UAT) to ensure final system features matched business requirements.

Real-Time Stock Analytics Platform | ITBA / System Analyst Role 11/2025 – 02/2026

- Conducted requirement gathering to define functional and non-functional specifications for a real-time stock analytics system.
- Modeled business workflows and microservices architecture using UML diagrams, including Use Case, Activity, Sequence, Class, and State diagrams.
- Designed Entity-Relationship Diagrams (ERD) and developed frontend interfaces for market heatmaps, price charts, and portfolio tracking.
- Specified RESTful APIs and WebSocket data flows for real-time streaming; defined Redis caching and Kafka pub/sub specifications.

Memoney - Photo-Based Expense Tracker | ITBA / Full-Stack & UI/UX Designer 03/2026 – 06/2026

- Elicited business requirements and mapped functional workflows for social photo-sharing and expense management modules.
- Designed UI/UX wireframes and interactive prototypes for the mobile application using Figma and Stitch AI.
- Developed frontend interfaces and RESTful APIs for custom camera filters and the expense tracking analytics dashboard.
- Executed User Acceptance Testing (UAT) and functional verification to ensure features matched business specifications.

CERTIFICATIONS & LANGUAGES

Certifications: IT Business Analysis Fundamentals (Udemy), TOEIC Listening & Reading 790/990

Languages: English (Intermediate), Vietnamese (Native)
